1918

Have Arrived

There are nine standard designs, including Roadsters, Touring Cars, three distinct types of Closed Cars, and last but not least a light Delivery Car. The 1918 Buick Line embodies many refinements, such as, 60 H. P. VALVE-IN-THE-HEAD motor of exceptional power and flexibility.

With this power plant we have a new style of control, which brings the gear shifting lever within easy reach without the operator bending forward. The dry plate multiple-disc clutch acts so pleasantly that a child can operate it.

The radiator and hood have been raised giving a straighter line to the design. A sloping windshield and a new style top with detachable gypsy curtains and improved side curtains have been adopted.

Larger and more roomy bodies of very rigid construction have been provided for the lengthened wheel base. All models have full U doors which are equipped with leather hand pads. Plaited buttonless upholstery of genuine leather over curled hair is used throughout.

These and many other features make the 1918 BUICK VALVE-IN-THE-HEAD a car that is admired and desired by all who see and ride in them.

From the fact that there are many more Buicks registered in the state than the nearest competitor, the blindest citizen can readily see that the Buicks are appreciated. It is the leading high-grade, medium-priced car on the American market. The only way to secure a Buick is to place your order for future delivery. Do it now.
